NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE A - BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements of EXEL Limited (the "Company") have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, these unaudited financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of financial position and results of operations as of the end of and for the periods presented. The results of operations for any interim period are not necessarily indicative of the results for a full year. The November 30, 1995 balance sheet data was derived from audited financial statements, but does not include all disclosures required by generally accepted accounting principles. For further information, refer to the consolidated financial statements for the fiscal year ended November 30, 1995, and footnotes thereto, included in the Company's Annual Report on Form 10-K (No. 1-10804).

NOTE B - INVESTMENT IN AFFILIATE

During the six months ended April 30, 1996 and 1995 the Company received dividends from its affiliate of \$5.1 million, and \$2.5 million, respectively.

EXEL LIMITED

Results of Operations for the Three Months Ended May 31, 1996

Compared to the Three Months Ended May 31, 1995

The following table presents an analysis of the Company's underwriting revenues for the periods indicated:

Three Months Ended

	May 31,				
	1996	1995 %	Change		
	(una	audited)			
Gross premiums written	\$160,169	\$112 , 011	43.0%		
Net premiums written	143,810	111,410	29.1		
Net premiums earned	131,952	135,145	(2.4)		

The increase in gross premiums written in 1996 was predominantly due to the growth in specialty reinsurance assumed (SRA), written primarily by the Company's newly formed subsidiary, X.L. Reinsurance Company, Ltd. (XLRe). These premiums are generally multi-year premiums reflecting net future year premiums of \$30.9 million of the total \$54.7 million recognized in the quarter. Gross premiums written adjusted for this multi-year effect was \$105.5 million compared to adjusted premiums for the 1995 quarter of \$109.8 million, a decrease of 3.9%.

The following table presents the split of gross premiums written by X.L. Insurance Company, Ltd. (X.L.), X.L. Europe Insurance (X.L.E.) and XLRe and reflects the growth in SRA for the periods indicated, adjusted for the effects of multi-year premiums:

Three Months Ended May 31,

	1996			1995			
	X.L.	X.L.E.	XLRe	Total	X.L.	X.L.E.	Total
				(Unaudited

Multi-year premiums	14,062	9,703	30,936	54,701	971	1,279	2,250
Gross premiums written	\$84,846	\$28,409	\$46,914	\$160,169	\$88,674	\$23,338	\$112,012
	=======	=======	=======	=======	======	======	=======

SRA policyholders are few in number with substantial multi-year premiums. These policies characteristically allow for the return of significant levels of premiums in the event no losses are incurred by the end of the policy term. Premiums assumed in the second quarter are not indicative of future periods.

SRA premiums assumed by X.L.E. relates solely to reinsurance protection provided to a Bermuda insurer who provides certificates of financial responsibility to ship owners for compliance with the U.S. Oil Pollution Act of 1990.

X.L., in conjunction with CIGNA Property and Casualty, has now written one policy of its recently announced product lines; Risk Solutions. The Company's traditional product lines, general, directors and officers, and professional liability continue to feel the impact of the tremendous competitive pressures from the U.S. domestic insurance market. These pressures are clearly reflected in an increase in the average attachment point from \$71.4 million to \$78.2 million and a decrease in the business retention rate from 87.2% to 86.7% for the Company's traditional product lines, for the three months ended May 31, 1995 and May 31, 1996 respectively.

The following table presents certain underwriting information with respect to the business written by the Company for the periods indicated:

	Gros	3S		Net	Ne	t -
Pr	emiums	Written	Premium	ms written	Premiums	earned
			Three Month	s Ended May 3	1	
19	96	1995	1996	1995	1996	1995

liability Professional liability Property	7,277 9,772 5,285	7,169 10,395 5,786	7,277 9,772 3,757	7,169 10,395 5,184	6,257 13,818 5,084	7,098 13,668 3,231
Risk solutions	5,700	-	4,125	-	117	-
Speciality reinsurance assumed	49,637	1,730	49 , 637	1,730	25,638	4,734
	160,169	112,011	143,810	111,409	131,952	135,145
Adjustment for multi- year premium Reinsurance ceded	(54,701)	(2,250)	(54,701) 13,256	(2,250)	16,453	- -
Adjusted premiums	\$105,468	\$109,761	\$102,365	\$109,159	\$148,405	\$135,145
				=======		

Net premiums written for the quarter ended May 31, 1996 was affected by a quota share reinsurance policy entered into for most general liability risks written on a guaranteed cost form, with certain exclusions, effective December 1, 1995. X.L. cedes 20% of these risks with total limits up to \$100 million and 25% with total limits in excess of \$100 million. Net premiums written adjusted for the general liability quota share and multi-year premiums, would have decreased 6.2%.

Net earned premiums were impacted by the growth in SRA premiums less the expense of premiums ceded under the new quota share arrangement. If the general liability quota share program was excluded, net earned premiums would have increased by 9.8%.

The following table presents an analysis of the Company's revenues from its portfolio of investments and its investment in affiliate:

May 31,	
1141 017	
1996 1995 % C	nange
(unaudited)	
Net investment income \$50,249 \$56,797 (1	1.5%)
., . , . , . , . , . , . , . , . , . ,	3.8
Equity in net earnings of affiliate 14,282 15,545 (3.1)

Net investment income for the second quarter in 1995 included unrealized currency gains of \$3.1 million compared to \$Nil for the comparative quarter in 1996, resulting in an adjusted decline of 6%. The decrease in investment income was caused by several factors. The U.S. bond market had remained strong for most of the second quarter of 1996 keeping yields low, unlike the comparable 1995 quarter which was weaker resulting in higher yields. The equity component of the total investment portfolio also increased to 19.8% from 15.9% as at May 31, 1995.

Equity in net earnings of affiliate decreased principally due to the Company's equity share of realized losses of \$2.0 million versus realized gains of \$5.9 million in the comparative quarter in 1995.

The following table sets forth the Company's combined ratios and the components thereof for the periods indicated using U.S. generally accepted accounting principles:

		Months Ended May 31,
	1996	1995
	(un	audited)
oss and loss expense ratio	78.5%	78.7%
Inderwriting expense ratio Combined ratio	14.9% 93.4%	15.5% 94.2%

The underwriting expense ratio decreased in the second quarter of 1996 compared to the same period of 1995 due to commissions earned on the new quota share reinsurance program. Excluding this reinsurance arrangement, the underwriting expense ratio for the said 1996 period would have been 16.0%.

Net income was \$89.0 million or \$1.90 per share and \$94.5 million or \$1.76 per share for the quarters ended May 31, 1996 and May 31, 1995, respectively, representing an increase of 8.0% per share. The increase in per share amounts is largely attributable to the buy back of Company shares resulting in weighted average shares outstanding of 46.8 million compared to 53.8 million for the respective quarters.

Results of Op	erations	for	the Si	x Months	Ended	May	31,1996
Compare	d to the	Six	Months	Ended M	ay 31,	1995	5
							-

The following table presents an analysis of the Company's underwriting revenues for the periods indicated:

	Six Months Ended May 31,			
	1996	1995	% Change	
	(unaud	lited)		
Gross premiums written Net premiums written Net premiums earned	\$379,299 307,523 262,210	\$250,124 249,482 265,891	51.6% 23.3 (1.4)	

The increase in gross premiums written in 1996 was predominately due to the growth in SRA premiums, written primarily by XLRe. These premiums are generally multi-year premiums, reflecting net future year premiums of \$100.5 million of the total \$95.9 million recognized in the period. Gross premiums written adjusted for this multi-year effect was \$283.4 million compared to adjusted premiums for the 1995 period of \$262.2 million, an increase of 8.1%.

The following table presents the split of gross premiums written by X.L., X.L.E and XLRe for the periods indicated, adjusted for the effects of multi-year premiums:

Six Months Ended May 31,

		======				=======	

XLRe is the primary writer of SRA. The SRA premiums written by X.L. represent the culmination of specific deals where the negotiations commenced prior to the incorporation of XLRe. SRA policyholders are few in number with substantial multi-year premiums. These policies characteristically allow for the return of significant levels of premiums in the event no losses are incurred by the end of the policy term. Premiums assumed in the first six months are not indicative of future periods.

SRA premiums assumed by X.L.E. relates solely to reinsurance protection provided to a Bermuda insurer who provides certificates of financial responsibility to ship owners for compliance with the U.S. Oil Pollution Act of 1990. The decline in premiums over the comparative quarter in 1995 reflects the development of the market where capacity was previously unavailable. It is expected additional premiums will be assumed on this program throughout the fiscal year, although at a level markedly lower than the first six months.

The Company's property and newly announced Risk Solutions lines were the only other areas of growth. The Company's traditional product lines, general, directors and officers, and professional liability continue to feel the impact of the tremendous competitive pressures from the U.S. domestic insurance market. These pressures are clearly reflected in an increase in the average attachment point from \$72.3 million to \$78.2 million and a decrease in the business retention rate from 88.6% to 86.2% for the Company's traditional product lines, for the six months ended May 31, 1995 and 1996, respectively.

The following table presents certain underwriting information with respect to the business written by the Company for the periods indicated:

	379,299	250,124	307,523	249,482	262,210	265,891	

Net premiums written for the six months ended May 31, 1996 was affected by a quota share reinsurance policy entered into for most general liability risks written on a guaranteed cost form, with certain exclusions, effective December 1, 1995. X.L. cedes 20% of these risks with total limits up to \$100 million and 25% with total limits in excess of \$100 million. Of the \$67.4 million of the premiums ceded under this program, \$35.5 million related to the cession of the Company's unearned premiums at December 1, 1995 to provide reinsurance coverage protection on in force policies from this date. Net premiums written adjusted for the general liability quota share and multi-year premiums, would have increased 6.7%.

Net earned premiums were impacted by the growth in SRA premiums less the expense of premiums ceded under the new quota share arrangement. If the general liability quota share program was excluded, net earned premiums would have increased by 11.2%

The following table presents an analysis of the Company's revenues from its portfolio of investments and its investment in affiliate:

	Six Months Ended May 31,					
	1996	% Change				
	(unaudited)					
Net investment income	\$ 98,022	\$106 , 967	(8.4%)			
Net realized gains (losses)	152,261	8,016	N/M			
Equity in net earnings						
of affiliate	30,395	20,598	47.6			

Net investment income for the first six months in 1995 included unrealized currency gains of \$4.2 million compared to \$Nil for the comparative period in 1996, resulting in an adjusted decline of 4.6%. The decrease in investment income was caused by several factors. The U.S. bond market had remained strong for most of the first half of 1996 keeping yields low, unlike the comparable 1995 period which was weaker resulting in higher yields. The equity component of the total investment portfolio also increased to 19.8% from 15.9% as at May 31, 1995. In addition, the Company has liquidated two fixed maturity portfolio and one equity portfolio due to similarities in strategies between managers, creating an influx of cash and the realization of significant gains. From the realized proceeds, \$250 million was used to capitalize XLRe.

Equity in net earnings of affiliate increased principally due to the Company's equity share of realized gains of \$2.0\$ million versus realized losses of \$4.7\$ million.

The following table sets forth the Company's combined ratios and the components thereof for the periods indicated using U.S. generally accepted accounting principles:

	May 31,		
	1996	1995	
	(unaud	ited)	
Loss and loss expense ratio	79.3%	78.5%	
Underwriting expense ratio	14.2%	15.3%	
Combined ratio	93.5%	93.8%	

The increase in the loss and loss expense ratio reflects an increase in the rate at which incurred but not reported reserves are established on the Company's casualty lines of business, which commenced during the fourth quarter of 1995.

The underwriting expense ratio decreased in the first six months of 1996 compared to the same period of 1995 due to commissions earned on the new quota share reinsurance program. Excluding this reinsurance arrangement, the underwriting expense ratio for the said 1996 period would have been 15.4%.

Net income was \$296.1 million or \$6.26 per share and \$151.4 million or \$2.81 per share for the six months ended May 31, 1996 and 1995, respectively, representing an increase of 123% per share. The increase in per share amounts is largely attributable to realized investment gains of \$152.3 million compared to \$8.0 million and a decrease in the weighted average shares outstanding from \$53.8 million to \$47.3 million.

Financial Condition and Liquidity

As a holding company, the Company's assets consist primarily of its investments in the stock of its subsidiaries and the Company's future cash flows depend on the availability of dividends or other statutorily permissible payments from its subsidiaries. In order to pay dividends, the amount of which is limited to accumulated net realized profits, the Company's principal subsidiary, X.L., must maintain certain minimum levels of statutory capital and surplus, solvency and liquidity pursuant to Bermuda statutes and regulations. At May 31, 1996, X.L. could have paid dividends in the amount of approximately \$950 million. Neither the Company nor any of its subsidiaries other than X.L. had any other restrictions preventing them from paying dividends. No assurance, however, can be given that the Company or its subsidiaries will not be prevented from paying dividends in the future. The Company's shareholders' equity at May 31, 1996 was \$1.9 billion, of which \$1.5 billion was retained earnings.

At May 31, 1996, total investments and cash net of the payable for investments purchased were \$3.6\$ billion compared to \$3.8\$ billion at November 30, 1995.

The Company purchased a further 2.5 million of its outstanding shares during the six months ended May 31, 1996, at a cost of \$174.3 million, increasing its treasury holding to 10.5 million shares. The Company has 500,000 shares remaining in its authorized share repurchase program.

The Company's fixed income investments (including short-term investments and cash and cash equivalents net of the payable for investments purchased) at May 31, 1996 represented approximately 80.2% of invested assets and were managed by several outside investment management firms and the Company's investment department with different strategies. All fixed income securities are of investment grade and include U.S. and non-U.S. sovereign government obligations and corporate and other securities. Of the Company's fixed income portfolio, 76% is rated Aa or AA or better by a nationally recognized rating agency or an investment manager. Cash and cash equivalents net of the payable for investments purchased was \$191.4 million at May 31, 1996, compared to \$437.3 million at November 30, 1995.

In connection with the Company's investment in MOCL, the Company has confirmed to MOCL that, subject to certain conditions, it will not, prior to May

1998, without the consent of the Directors of MOCL, increase its ownership of MOCL shares if, as a result, it would own more than 30% of MOCL's outstanding voting shares or more than 25% of MOCL's shares on a fully diluted basis. In connection with the previously announced authorization by the Directors of MOCL for the repurchase of up to \$75 million of MOCL shares, the Company has confirmed its intention to decrease proportionately the number of shares of MOCL owned by it so as to maintain its percentage ownership of MOCL at a level no greater than at present.

In fiscal 1994, 1995 and in fiscal 1996 through May 31, the total amount of losses paid by the Company was \$138.7 million, \$188.5 million and \$201.7 million, respectively.

Insurance practices and regulatory guidelines suggest that property and casualty insurance companies maintain a ratio of net premiums written to statutory capital and surplus of not greater than 3 to 1, with a lower ratio considered to be more prudent for a company that insures the types of exposures written by X.L. X.L. maintained a ratio of less than 0.9 to 1 for the year ended November 30, 1995 and 0.3 to 1 (calculated on an annualized basis) for the six months ended May 31, 1996. The decrease is reflective of a decrease in gross premiums written on X.L.'s traditional lines coupled with the premiums ceded under the general liability quota share treaty which was effective December 1, 1995.

X.L. establishes reserves to provide for the estimated expenses of settling claims, the general expenses of administering the claims adjustment process and for losses incurred but not reported. X.L. calculates such reserves by using actuarial and other reserving techniques to project the estimated ultimate net liability for losses and loss expenses. No assurance can be given that actual claims made and payments related thereto will not be in excess of the amounts reserved.

Inflation can have an effect on the Company in that inflationary factors can increase damage awards and potentially result in more claims exceeding applicable minimum attachment points. The Company's underwriting philosophy is to adjust premiums in response to inflation, although this may not always be possible due to competitive pressures. Inflationary factors are considered in determining the premium level on multi-year policies at the time the contracts are written. In addition, the Company from time to time evaluates whether minimum attachment points should be raised to take into account inflationary factors; as of this date, no revisions to minimum attachment points have been implemented.

Outlook

The Company believes competitive pressures will continue throughout fiscal 1996 and constrain growth in the Company's traditional product lines. However, the Company believes specific opportunities will exist through the further growth of the Company's property product line, the release of the new employment practices liability product, XLRe and the CIGNA Risk Solutions and X.L. Risk Solutions provided through a strategic alliance between X.L. and CIGNA Property & Casualty.

ITEM 4 - SUBMISSION OF MATTERS TO A VOTE OF SHAREHOLDERS

At the Annual General Meeting of Shareholders held on March 29, 1996 at the Hyatt Regency Hotel, Grand Cayman, British West Indies, the shareholders

approved the following :

1. To elect Class II Directors to hold office until 1998 :

	Votes	Votes
	For*	Against*
Robert Clements	40,929,281	122,910
Michael P. Esposito, Jr	40,928,266	122,925
Cyril Rance	40,927,717	123,474
Ellen E. Thrower	40,923,247	127,944

Messrs. Gould, Heap, London, Parker, Seneter, O'Hara, Thornton and Weiser continue in office.

2. To appoint Coopers & Lybrand, Bermuda as independent Auditors for the fiscal year ending November 30, 1996;

Votes*

For - 41,009,286 Against - 33,508 Abstaining - 8,397

3. The Company's Stock Plan for non-employee directors ;

Votes*

For - 36,812,860 Against - 3,460,182 Abstaining - 778,149

4. Amendment to EXEL Limited Directors Stock & Option Plan ;

Votes*

For -34,811,065 - Against -5,459,475 - Abstaining -780,651.

* Before giving effect to the applicable provisions in the Company's Articles of Association which limit the voting rights with respect to the shares of any person or "group" of persons beneficially owning (within the meaing of Section 13(d) (3) of the Securities Exchange Act of 1934) 10% or more of the issued Ordinary Shares of the Company to a voting power of one share less than 10% pursuant to a formula specified in the Articles of Association.

According to filings made with the Securities and Exchange Commission, two separate "group" of persons may each beneficially own in excess of 10% of the issued Ordinary Shares of the Company. If the voting power of such groups were limited pursuant to the formula specified power of such groups were limited pursuant to the formula specified in the Articles of Association, the matters voted on by shareholders as set forth above would still have been approved by the required vote of the shareholders.
